RE: MPSC Case No. U-22070

Dear Ms. Felice:

The following is attached for paperless electronic filing:

**Proof of Service for Urban Core Collective's Third Discovery Request to Consumers
Energy Company.**

Please do not hesitate to contact my office with any questions or comments.

Sincerely,

Mark N. Templeton (*pro hac vice*)
6020 S. University Avenue
Chicago, IL 60637
Phone: (773) 702-9611
Email: templeton@uchicago.edu

xc: Parties to Case No. U-22070

STATE OF MICHIGAN
BEFORE THE MICHIGAN PUBLIC SERVICE COMMISSION

In the matter of the Application of
CONSUMERS ENERGY COMPANY for
authority to increase its rates for generation and
distribution of electricity and for other relief.

Case No. U-22070

ALJ Christopher S. Saunders

**URBAN CORE COLLECTIVE’S THIRD DISCOVERY REQUEST
TO CONSUMERS ENERGY COMPANY**

Definitions

As used in these discovery requests, the words and phrases below have the following specific meanings, unless indicated otherwise in the specific question:

- A. “Consumers,” “Company,” “CE,” “you,” and “your” refer to Consumers Energy Company, its affiliated companies, predecessors-in-interest, officers, directors, partners, employees, and representatives.
- B. “MPSC” refers to the Michigan Public Service Commission.
- C. “UCC” refers to the Urban Core Collective.
- D. “Consumers’ Application” and “Application to the MPSC”, unless otherwise specified, refer to the application that Consumers submitted to the Michigan Public Service Commission (MPSC) on June 2, 2026 (Case No. U-22070) for authority to increase rates for the generation and distribution of electricity and for other relief, as well as the testimony and exhibits that Consumers filed with the MPSC on the same date in support thereof.
- E. “Representatives” includes directors, officers, employees, agents, consultants, witnesses, attorneys or other persons acting on behalf of the party to which these interrogatories and document requests are served.
- F. “Person” or “persons” includes natural persons as well as firms, partnerships, associations, institutions, joint ventures, corporations, governmental entities, administrative agencies, professional associations, and every other organization of whatever sort.
- G. “Describe” means to provide a complete description and explanation of the facts, circumstances, analysis, opinion and other information relating to (as that phrase is defined below) the subject matter of a specific discovery request.
- H. “Document” means any written or graphic material, however produced and reproduced of any written, recorded, electronic, printed, typed or handwritten matter of any kind or nature, including but not limited to the following: all letters, memoranda, reports (preliminary and final), work papers, spreadsheets, studies, sample and/or testing

protocols, diaries, logs, maps, pamphlets, notes, charts, graphs, calendars, schedules, tabulations, analyses, records, statistical information, accumulations, books, magazines, summaries, minutes, records of meetings and conversations of any kind, photographs, slides, film impressions, microfilm, microfiche, magnetic tapes, sound or mechanical reproductions, electronic files, computer disks or tapes, projections, instruments, drawings, including drafts, copies, copies with margin notes or reproductions, reports, summaries of investigations or negotiations, opinions or reports of consultations, press releases, e-mail, and other data compilations from which information can be obtained, translated (if necessary) by the respondent through detection devices into reasonably useable form.

I. Communication

- a. The term “communication” means any transmission of information by oral, graphic, written, pictorial, digital, or otherwise perceptible means, including, but not limited to, telephone conversations, e-mail, text messages, letters, telegrams, and personal conversations.
 - b. A request seeking the identity of the source of a communication, addressing, relating or referring to, or discussing a specified matter encompasses documents having factual, contextual, or logical nexus to the matter, as well as communications in which explicit or implicit reference is made to the matter in the course of the communication.
- J. “Relating to,” “relevant,” and “pertaining to” means and shall include containing, constituting, considering, comprising, concerning, discussing, regarding, describing, reflecting, studying, commenting or reporting on, mentioning, analyzing, or referring, alluding, or pertaining to, in whole or in part.
- K. “Low-income customer” means a Consumers customer whose household income does not exceed 200% of the poverty level, as published in federal poverty guidelines from the United States Department of Health and Human Services.
- L. “Of color,” as in the phrase “people of color,” “Black, Indigenous, and Persons of Color,” and “BIPOC,” as applied to persons, groups of persons, or Consumers customers, means having a race, or being comprised predominantly of persons having a race, that is not white, as defined under the 2010 United States census.
- M. “Black, Indigenous, and Persons of Color” and “BIPOC” as applied to persons, groups of persons, or Consumers customers, means having a race, or being comprised predominantly of persons having a race, that is not white, as defined under the 2010 United States census.
- N. “Testimony” of a witness, unless otherwise specified, means that witness's testimony in the present case, MPSC Case No. U-22070.

Instructions

- For the response to each question below, please:
- Identify the person responding and provide their title;
- Provide any and all Documents, including but not limited to Communications, that support the response;
- List any and all assumptions made by the person responding to the question;
- Identify specific time periods covered by the response if relevant to the question and answer, and if the reference to a particular year refers to a twelve-month period that does not start on January 1 and end on December 31 of that year, please provide the specific start and end dates;
- Provide the basis for any privilege claimed, including all details necessary to support that claim of privilege;
- Interpret “including” to mean “including without limitation” and interpret “and” and “or” inclusively rather than exclusively; and
- Provide any updates to the Company’s responses if there is a material change in the information included in the response.

Discovery Requests and Interrogatories

For all responses involving data, provide data in native, unlocked .csv or .xlsx format with all formulas intact.

For date-specific requests, if data is not available as far back as the requested date, provide the oldest available data. If data is not available at the requested frequency (e.g., monthly), provide data at the highest available frequency (e.g., quarterly or annual instead of monthly).

For geographic requests, if data is not available at the requested geographic resolution, provide data at the finest available resolution (e.g., by municipality rather than by zip code).

For all data responses, including those already provided and responses that are forthcoming, in which you provide census tract-level data, please provide the census tract identifier in the 11-digit US Census FIPS Code form. This should include the 2-digit state FIPS code + 3 digit county FIPS code + 6 digit county FIPS code (e.g. Census Tract 2231 in Harris County, TX is 48201223100).

22070-UCC-CE-0423

1. For all requests in Urban Core Collective’s First Discovery Request to Consumers Energy Company and in Urban Core Collective’s Second Discovery Request to Consumers Energy Company for which you have or will provide census tract-level data, please provide the census tract identifier in the 11-digit US Census FIPS Code form. This should include the 2-digit state FIPS code + 3 digit county FIPS code + 6 digit county FIPS code (e.g. Census Tract 2231 in Harris County, TX is 48201223100). For example (but not limited to this example), this request applies to U22070-UCC-CE-0091_Gast_Att_1, column c in tabs a-e.

22070-UCC-CE-0424

- 2. Please refer to Consumers’ response to U22070-UCC-CE-0112. Provide monthly residential consumption data by the set percentiles (5th, 10th, 25th, 50th, 75th, 90th, 95th) by individual month in 2025. This should result in 12 tables, one for each month, that are identically formatted as the table in the U22070-UCC-CE-0112 response.

22070-UCC-CE-0425

- 3. By census tract, please provide the following data by month, starting in January 2019, through the most recent month available. If the Company does not have this data at census tract resolution, provide data at the finest available resolution (e.g., by zip code). If data is not available by month, provide data at the most available frequency (e.g., quarterly, annually). Provide all data for residential customers only. Provide all responses in unlocked, native Excel (.xlsx) or .csv format with formulas intact.
 - a. Total customer counts for all-electric heating customers;
 - b. Total customer counts for all customers with air source heat pumps; and
 - c. Total customer counts for electric customers with non-electric heating.

22070-UCC-CE-0426

- 4. By census tract, please provide the following data by month, starting in January 2019, through the most recent month available. If the Company does not have this data at census tract resolution, provide data at the finest available resolution (e.g., by zip code). If data is not available by month, provide data at the most available frequency (e.g., quarterly, annually). Provide all data for residential customers only. Provide all responses in unlocked, native Excel (.xlsx) or .csv format with formulas intact. The outputs should follow the format of the three tables below.
 - a. Total consumption (in total kWh) for all-electric heating customers, grouped in the following percentiles: 5th, 10th, 25th, 50th, 75th, 90th, 95th;
 - b. Total consumption (in total kWh) for consumption and counts for all customers with air source heat pumps, grouped in the following percentiles: 5th, 10th, 25th, 50th, 75th, 90th, 95th; and
 - c. Total consumption (in total kWh) for electric customers with non-electric heating, grouped in the following percentiles: 5th, 10th, 25th, 50th, 75th, 90th, 95th.

For all-electric heating customers:

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

For customers with air-source heat pumps:

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

For non-electric heating customers:

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

22070-UCC-CE-0427

- What is the peak demand of the residential class (cumulative of all customers) for each day of the year in 2025? In other words, we request the combined peak demand for all residential customers, for each day of the year. This response should produce 365 rows. If daily data is not available, provide the peak wattage by month.

22070-UCC-CE-0428

- Provide the peak demand of the residential class by percentile, for each month of 2025. See the table below for the requested format.

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

22070-UCC-CE-0429

- Please provide the total number of customers for all Consumers' electric rate plans by rate schedule by month, since January 2019 through the most recent month when data is

available. If the information is not available by hour, please provide the next most frequent resolution (e.g., by day).

22070-UCC-CE-0430

8. For each rate schedule, please provide the total consumption of all customers, by hour since January 2019 through the most recent month when data is available (e.g., for each rate schedule, provide one row for the 8760 hours in a non-leap year). If the information is not available by hour, please provide the next most frequent resolution (e.g., by day).

22070-UCC-CE-0431

9. Please refer to Consumers' response to U22070-UCC-CE-0105. In Gast Attachment 1, Dunning Levels are mentioned multiple times. Please define all Dunning Levels used by the Company, including:
 - a. How is each Dunning Level characterized, and what does it reflect?
 - b. How and when are customers assigned to each level (e.g., what history of arrears, defaults, etc.)?
 - c. What policies, protocols, and/or procedures does the Company apply to customers at each Dunning Level?

22070-UCC-CE-0432

10. Please refer to Consumers' response to U22070-UCC-CE-0105. Please explain any differences between Current and 9-Month Dunning Levels.

22070-UCC-CE-0433

11. Please refer to Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1. When assessing the Dunning Level, what risk levels does the Company assign to customers, and how is each level defined and determined? Please detail how the procedures for assigning and determining risk level were established.

22070-UCC-CE-0434

12. For each Dunning Level the Company uses, provide the following:
 - a. Deposit calculations associated with each Dunning Level;
 - b. Time until the customer is disconnected;
 - c. Customer eligibility for a hold or disconnection protection;
 - d. Eligibility for payment plans and the required down / initial payments;
 - e. Any proactive efforts by the Company to enroll the customer in bill assistance programs;
 - f. Any proactive efforts by the Company to enroll the customer in alternative rate plans; and
 - g. Any proactive efforts by the Company to enroll the customer in programs designed to reduce energy consumption.

22070-UCC-CE-0435

13. Please refer to page 7 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which references Sealed for Non-Payment (SNP)/Defaults. How are SNP / Default Amounts and Pending SNP/Default Dates set for each customer? Provide any

specific formulas, calculation methods, or practices the Company uses to set SNP/Default Amounts and Pending SNP/Default Dates.

22070-UCC-CE-0436

14. By month, since January 2019 through the most recent month data is available, how many customers defaulted from the following programs? If data is not available for the full date range or by month, provide data by quarter or by year, and as far back as data is available.
- a. Winter Shutoff Protection (WPP);
 - b. Shutoff Protection Plan (SPP);
 - c. Consumers Affordable Resource for Energy (CARE) Program;
 - d. Percentage of Income Payment Plan (PIPP);
 - e. and Other Installment Plan (IP).

22070-UCC-CE-0437

15. How does a customer enroll in the Shutoff Protection Plan (SPP)? Please provide copies of all required forms, a list of steps the customer must complete, and the associated enrollment timelines.

22070-UCC-CE-0438

16. How does a customer enroll in the Winter Protection Plan (WPP)? Please provide copies of all required forms, a list of steps the customer must complete, and the associated enrollment timelines.

22070-UCC-CE-0439

17. Describe all known causes of erroneous or incorrect disconnections, how the Company learns of these errors, and any steps the Company takes to mitigate these issues.

22070-UCC-CE-0440

18. If the Company erroneously or incorrectly disconnects a customer, how does the Company resolve that occurrence?

22070-UCC-CE-0441

19. By month, since January 2019 through the most recent month for which data is available, how many disconnections were later determined to have been erroneous or incorrect?

22070-UCC-CE-0442

20. Please refer to page 3 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1. What does the "SNAP" acronym stand for and refer to? Please provide all current SNAP guidelines, articles, field work warnings, and other training or guidance documents that the Company provides to its staff.

22070-UCC-CE-0443

21. In U22070-UCC-CE-0105_Gast_Att_1, the SAP screenshots have a space for Dunning Procedure (e.g., PDF file page 118 ("CARE-Enrolled" slide 12, "CMS Accelerated Dunning Procedure")). Please provide all Dunning Procedure codes the Company uses, the definition of each, the associated procedures, and the customer conditions, criteria, or circumstances for when each code is applied.

22070-UCC-CE-0444

22. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans.
- Please spell out the "ASP" and "CO" acronyms and provide their definitions.
 - Provide all possible codes or statuses for ASP and CO plans.

22070-UCC-CE-0445

23. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans. Please provide the data requested below by census tract; if the information is not available at the census tract level, please provide it at the finest resolution available (e.g., zip code).
- By month, since January 2019 through the most recent month data is available, how many customers were enrolled in each type of ASP and CO plan?
 - By month, since January 2019 through the most recent month data is available, what were the total residential payments for each type of ASP and CO plan?
 - By month, since January 2019 through the most recent month data is available, what were the total payments for each type of ASP and CO plan by customers who received a disconnect notice?
 - By month, since January 2019 through the most recent month data is available, what were the total cumulative historical payments for each type of ASP and CO plan by customers who were disconnected in that month?
 - By month, since January 2019 through the most recent month data is available, what is the average share of arrears at disconnection that are due to ASP and CO charges?
 - By month, since January 2019 through the most recent month data is available, how many customers enrolled in each type of ASP and CO plan were disconnected for non-payment in that month?

22070-UCC-CE-0446

24. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans. How does the Company determine the customer charges associated with each type of ASP and CO plan? Please provide any associated formulas or calculation methodologies.

22070-UCC-CE-0447

25. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans. Can customers be disconnected for current or past-due charges on ASP or CO plans? If yes, please describe all related policies and procedures.

22070-UCC-CE-0448

26. For dual gas and electric customers who have received an Intent to Disconnect notice:
- How does the Company account for past-due balances on dual accounts?
 - What options do dual customers have to direct payment to one account rather than to another?

- c. How does the Company communicate any options that customers have to direct payments to one account rather than another to dual customers who face potential disconnection(s)?
- d. How do customers exercise any options that they have to direct payment to one account rather than another?
- e. How does the Company communicate these options to dual customers who face potential disconnection(s)?
- f. How does the Company allocate payments between the past due balances on dual accounts in the absence of any specific direction from a customer?
- g. If a customer cannot avoid disconnection on both accounts, what options do they have to prevent disconnection on one of the accounts?
- h. How does the Company communicate these options to prevent disconnection on one of the accounts to dual customers who face potential disconnection(s)?

22070-UCC-CE-0449

27. Describe any efforts by the Company to address long-duration disconnections or households that experience multiple disconnections.

22070-UCC-CE-0450

28. By month, since January 2019 through the most recent month data is available, what are the default rates of Flex Plans (aka “Installment Plans”) for customers with the following risk level assignments?

- a. Low risk level;
- b. Medium risk level; and
- c. High risk level.

22070-UCC-CE-0451

29. Please refer to page 1 of Consumers’ response to U22070-UCC-CE-0105, Gast Attachment 4, which states that as of January 1, 2026, Critical Peak Pricing (CPP) and Peak Time Rewards (PTR) should not be promoted. Why does the Company no longer promote these programs?

22070-UCC-CE-0452

30. Please refer to page 1 of Consumers’ response to U22070-UCC-CE-0105, Gast Attachment 4, which states that as of January 1, 2026, Critical Peak Pricing (CPP) and Peak Time Rewards (PTR) incentive payments are paused. Why are the incentive payments paused?

22070-UCC-CE-0453

31. Please refer to page 1 of Consumers’ response to U22070-UCC-CE-0105, Gast Attachment 4, which states that as of January 1, 2026, Critical Peak Pricing (CPP) and Peak Time Rewards (PTR) incentive payments are paused. If the Company enrolls a customer in the Critical Peak Pricing (CPP) and Peak Time Rewards (PTR), does the Company communicate to the enrolling customer that “the incentive program is paused and that payouts will not be made”?

22070-UCC-CE-0454

32. What are the average savings per kWh for participants in the following rate programs?
- a. Critical Peak Pricing (CPP);
 - b. Peak Time Rewards (PTR); and
 - c. AC Cycling.

22070-UCC-CE-0455

33. By month, since January 2019 through the most recent month data is available, what percentage of participants in each of Critical Peak Pricing (CPP), Peak Time Rewards (PTR), and AC Cycling rates were designated by the Company as low-income (i.e., participating in an income-eligible bill assistance program or known to participate in SER, LIHEAP, etc.)?

22070-UCC-CE-0456

34. Why are the enrollments for Critical Peak Pricing (CPP), Peak Time Rewards (PTR), and AC Cycling capped, how were each of the program caps established, and by whom were each of the program caps established?

22070-UCC-CE-0457

35. What are the average consumption changes (overall kWh, on-peak, critical peak kWh) and financial benefits per participant for each of Critical Peak Pricing (CPP), Peak Time Rewards (PTR), and AC Cycling?

22070-UCC-CE-0458

36. Please refer to page 3 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 6, which indicates that the AC Cycling program is not accepting new participants. Why not?

22070-UCC-CE-0459

37. Please refer to Consumers' response to U22070-UCC-CE-0135 and U22070-UCC-CE-0136. Please provide all program-specific metrics, operational metrics, participation metrics, long-term success metrics, and any other metrics relevant to these responses. For each metric, provide the metric title, definition, list of programs the metric is used by, calculation method, and the quantitative value, by month, since January 2019 through the most recent month for which data is available.

22070-UCC-CE-0460

38. For customers who remain disconnected due to non-payment, provide all Company policies or procedures for communicating with and/or reconnecting these customers in advance of extreme weather, such as extreme heat or extreme cold.

22070-UCC-CE-0461

39. How many disconnected residential customers did the Company reconnect in advance of the following dates in 2026:
- a. January 20, 21, or 22;
 - b. February 4 or 5;
 - c. June 10 or 11;

- d. July 1 or 2; and
- e. July 13, 14, or 15.

22070-UCC-CE-0462

- 40. Please reference page 11 of Witness Foster's testimony, "Digitization of Company Records Costs" and Consumers' response to U22070-UCC-CE-0140. Approximately what percentage of these records are more than seven years old?

22070-UCC-CE-0463

- 41. Please reference Consumers' response to U22070-UCC-CE-0141. Please provide the RFP or information that the Company provided to potential vendors for this project. Please provide vendor estimates provided to the Company for digitization of Company records. Please also provide the "analysis of the volume of records housed" that require digitization, as well as any criteria used to determine which records require digitization.

22070-UCC-CE-0464

- 42. Please reference Consumers' response to U22070-UCC-CE-0141. Please provide any analysis or data that the Company has regarding the frequency and volume of documents retrieved from the Company's record center.

22070-UCC-CE-0465

- 43. Please reference Consumers' response to U22070-UCC-CE-0141. Provide the two pricing estimates (i.e., the total cost) that the Company received for the digitization of records.

22070-UCC-CE-0466

- 44. Does the \$10 million cost to digitize records referenced in Consumers' response to U22070-UCC-CE-0141 directly reflect vendors' pricing estimates? If the Company has adjusted its estimate based on the estimates it received from the vendors, please detail the reasons for the difference in the cost estimate and the methodology the Company used to arrive at its own estimate.

22070-UCC-CE-0467

- 45. By census tract, what is the percentage of residential customers with smart meters? If census tract resolution data is not available, provide data at the finest geographic resolution available (e.g., zip code).

22070-UCC-CE-0468

- 46. What model or models of smart meters do Consumers' residential customers have? Please provide the manufacturer, model number, and model year for each type of smart meter deployed.

22070-UCC-CE-0469

- 47. For each type of smart meter deployed in response to question 46, please indicate whether each of the smart meter models has the capacity to limit the flow of electricity to residential customers to a set wattage, and if yes, what that wattage is.

22070-UCC-CE-0470

48. Please indicate whether Consumers' existing IT platforms have the ability or could be configured to limit the flow of electricity to residential customers to a set wattage.

22070-UCC-CE-0471

49. For each type of smart meter model, please provide the count and percentage of residential customers who have that model. Please also provide the count and percentage of residential customers who do not have a smart meter.

22070-UCC-CE-0472

50. For customers without smart meters, please provide the percentage of smart meters that were not installed because of:

- a. Incompatible electrical or wiring systems;
- b. Poor wireless signal coverage;
- c. Customer refusal to have a smart meter installed; or
- d. All other causes.

Chicago, IL 60637
Phone: (773) 702-9611
templeton@uchicago.edu

Question:

1. For all requests in Urban Core Collective's First Discovery Request to Consumers Energy Company and in Urban Core Collective's Discovery Request to Consumers Energy Company for which you have or will provide census tract-level data, please provide the census tract identifier in the 11-digit US Census FIPS Code form. This should include the 2-digit state FIPS code + 3 digit county FIPS code + 6 digit county FIPS code (e.g. Census Tract 2231 in Harris County, TX is 48201223100). For example (but not limited to this example), this request applies to U22070-UCC-CE-0091_Gast_Att_1, column c in tabs a-e.

Response:

See 0423_Gast_Att_1.zip for the updates to previously submitted data.

Witness: Alex M Gast

Date: August 17, 2026

Question:

2. Please refer to Consumers' response to U22070-UCC-CE-0112. Provide monthly residential consumption data by the set percentiles (5th, 10th, 25th, 50th, 75th, 90th, 95th) by individual month in 2025. This should result in 12 tables, one for each month, that are identically formatted as the table in the U22070-UCC-CE-0112 response.

Response:

For monthly residential consumption, the Company provided the most recent average electric consumption in kWh sampled from the RSP population for the period of January 2025 through December 2025. As requested, please refer to the tables below, formatted to the table in the U22070-UCC-CE-0112 response, split out by the requested distribution of percentiles and by individual month.

PERCENTILE	JAN AVG KWH	PERCENTILE	FEB AVG KWH	PERCENTILE	MAR AVG KWH
5	178	5	154	5	142
10	296	10	253	10	240
25	489	25	417	25	407
50	758	50	651	50	631
75	1,218	75	1,053	75	985
90	1,890	90	1,642	90	1,467
95	2,495	95	2,164	95	1,853

Date: August 11, 2026

Question:

3. By census tract, please provide the following data by month, starting in January 2019, through the most recent month available. If the Company does not have this data at census tract resolution, provide data at the finest available resolution (e.g., by zip code). If data is not available by month, provide data at the most available frequency (e.g., quarterly, annually). Provide all data for residential customers only. Provide all responses in unlocked, native Excel (.xlsx) or .csv format with formulas intact.

- a. Total customer counts for all-electric heating customers;
- b. Total customer counts for all customers with air source heat pumps; and
- c. Total customer counts for electric customers with non-electric heating.

Response:

The data requested is not available.

Witness: Eugène M Breuring

Date: August 14, 2026

4. By census tract, please provide the following data by month, starting in January 2019, through the most recent month available. If the Company does not have this data at census tract resolution, provide data at the finest available resolution (e.g., by zip code). If data is not available by month, provide data at the most available frequency (e.g., quarterly, annually). Provide all data for residential customers only. Provide all responses in unlocked, native Excel (.xlsx) or .csv format with formulas intact. The outputs should follow the format of the three tables below.

- For all-electric heating customers:

[illegible]

For customers with air-source heat pumps:

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

For non-electric heating customers:

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

Response:

The data requested is not available.

Witness: Eugène M Breuring

Date: August 14, 2026

Question:

5. What is the peak demand of the residential class (cumulative of all customers) for each day of the year in 2025? In other words, we request the combined peak demand for all residential customers, for each day of the year. This response should produce 365 rows. If daily data is not available, provide the peak wattage by month.

Response:

Please see the Company's response to U-22070-SA-CE-184 for hourly load data by COSS class from the load study.

Witness: Emily A. Davis

Date: August 14, 2026

Question:

6. Provide the peak demand of the residential class by percentile, for each month of 2025. See the table below for the requested format.

Perce ntile	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
5th												
10th												
25th												
50th												
75th												
90th												
95th												

Response:

The Company's load study does not develop separate residential profiles in the requested percentiles; it provides a total load profile for the entire residential class. Please see the Company's response to U-22070-SA-CE-184 for hourly load data for the residential class.

Witness: Emily A. Davis

Date: August 14, 2026

Question:

7. Please provide the total number of customers for all Consumers' electric rate plans by rate schedule by month, since January 2019 through the most recent month when data is available. If the information is not available by hour, please provide the next most frequent resolution (e.g., by day).

Response:

Please see attachment U22070-UCC-CE-0429_Att1.xlsx for electric customer counts.

Witness: Eugène M Breuring

Date: August 14, 2026

Question:

8. For each rate schedule, please provide the total consumption of all customers, by hour since January 2019 through the most recent month when data is available (e.g., for each rate schedule, provide one row for the 8760 hours in a non-leap year). If the information is not available by hour, please provide the next most frequent resolution (e.g., by day).

Response:

Please see the Company's response to U-22070-SA-CE-184 for hourly load data by COSS class from the load study.

Witness: Emily A. Davis

Date: August 14, 2026

Question:

9. Please refer to Consumers' response to U22070-UCC-CE-0105. In Gast Attachment 1, Dunning Levels are mentioned multiple times. Please define all Dunning Levels used by the Company, including:

- a. How is each Dunning Level characterized, and what does it reflect?
- b. How and when are customers assigned to each level (e.g., what history of arrears, defaults, etc.)?
- c. What policies, protocols, and/or procedures does the Company apply to customers at each Dunning Level?

Response:

a. Dunning Levels are characterized as past-due collection process steps. Each level reflects the customer's position in the Company's collection process for past-due charges and helps ensure that applicable regulated and non-regulated collection communications and notifications are completed before a customer becomes eligible for disconnection for non-payment.

b. The Company does not currently assign Dunning Levels based on a customer's history of arrears, payment plan defaults, or other credit-risk indicators. Rather, Dunning Levels reflect the collection step associated with a customer's current past-due balance. The process is initiated when a customer's current bill is past due by five or more days.

c. The policies, protocols, and procedures applied to customers whose current bills are past due by five or more days were previously outlined in the Company's response to Question 30 in U22070-UCC-CE-0119. The corresponding Dunning Level assignments are summarized below:

Dunning Level 05	Due Date +5 days	Mailed shut off notice
Dunning Level 10	Due Date +9 days	Intent to disconnect phone call
Dunning Level 20	Due Date +10 days	2 nd Intent to disconnect phone call (if previous call was unsuccessful)
Dunning Level 35	Due Date +12 days	If calls were unsuccessful an intent to disconnect notice is mailed
Dunning Level 40	Due Date +18 days	Eligible to disconnect
Sealed for non-payment	Due Date +19 to 32 days	Disconnection for nonpayment occurs

Witness: Alex M Gast

Date: August 14, 2026

Question:

10. Please refer to Consumers' response to U22070-UCC-CE-0105. Please explain any differences between Current and 9-Month Dunning Levels.

Response:

U22070-UCC-CE-0105 does not contain the dunning levels references in this question. The response provided will outline if there is any variance in options for customers with late-stage arrears verses those with more current arrears.

The Company's available customer options do not differ based solely on whether a customer is in a current or late-stage arrears status. The same general options may be available, including payment arrangements, assistance referrals, holds, or other applicable protections, subject to the customer's circumstances and eligibility. What may differ is whether a particular customer remains eligible for a specific option based on the customer's prior use of, and success with, that option. For example, prior defaults, failed payment arrangements, returned payments, prior removals from a program, or other account history may affect whether the customer can use the same option again and may affect the required terms, such as the down payment amount or duration of a payment arrangement.

Witness: Alex M Gast

Date: August 14, 2026

Question:

11. Please refer to Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1. When assessing the Dunning Level, what risk levels does the Company assign to customers, and how is each level defined and determined? Please detail how the procedures for assigning and determining risk level were established.

Response:

The Company does not assign customer risk levels for purposes of assessing or determining Dunning Levels. Dunning Levels are not risk classifications; rather, they identify sequential steps in the Company's collection process when a customer does not make payment by the due date of the bill.

The Company uses risk levels only in connection with determining eligibility and terms for certain Flex Pay options. The criteria used to assign risk levels for Flex Pay purposes are provided in the Company's response to U22070-UCC-CE-0434, Response 12.d.

Witness: Alex M Gast

Date: August 14, 2026

Question:

12. For each Dunning Level the Company uses, provide the following:

- a. Deposit calculations associated with each Dunning Level;
- b. Time until the customer is disconnected;
- c. Customer eligibility for a hold or disconnection protection;
- d. Eligibility for payment plans and the required down / initial payments;
- e. Any proactive efforts by the Company to enroll the customer in bill assistance programs;
- f. Any proactive efforts by the Company to enroll the customer in alternative rate plans; and
- g. Any proactive efforts by the Company to enroll the customer in programs designed to reduce energy consumption.

Response:

a. The Company does not use Dunning Levels to calculate deposit amounts. If a customer has reached Dunning Level 40, which indicates that the account is eligible for disconnection for non-payment subject to applicable rules, tariffs, and required notices, that status may be considered in determining whether a deposit may be applicable. However, the Dunning Level does not determine the deposit calculation.

b. The Company does not use Dunning Levels to determine when a customer will be disconnected. Dunning Levels identify sequential steps in the collection process for a customer with a past-due balance. Disconnection for non-payment does not occur before required customer notifications are completed and applicable rules, tariffs, and procedures are satisfied.

c. The Company does not generally use Dunning Levels to determine eligibility for holds or disconnection protections. One exception is that a Payment Pending Hold may be unavailable once a customer reaches Dunning Level 40, because the purpose of that hold is to allow additional time for payment before the account becomes eligible for disconnection.

d. The Company uses Dunning Level 35, which reflects issuance of an intent-to-disconnect notice, as one component in determining Flex Pay eligibility and terms. This Dunning Level indicator is considered with other factors, including the number of prior seals for non-payment, prior removals from payment plans, length of service, and returned payments.

Service Duration	DL35s	SNPs	Defaults	NSFs	Risk Level
0-11 months	0	0	0	0	Low
0-11 months	1	0	1	0	Medium
0-11 months	≥2	≥1	≥2	≥1	High
12 months or more	≤1	0	≤1	0	Low
12 months or more	2	1	2	1	Medium
12 months or more	≥3	≥2	≥3	≥2	High

Payment Plan Options based on risk level:

- **Low risk level:**
 - Eligible for an installment plan with a first payment of at least 10% and a maximum length of 12 months.
 - Low-risk customers whose account has been open for less than a year must pay the first payment within 10 days, and those whose account has been open for longer must pay the first payment within 30 days.
- **Medium risk level:**
 - Eligible for an installment plan with a first payment of at least 25%.
 - Medium risk customers whose account has been open for less than a year must pay the first payment within 5 days and finish the plan within 6 months. Those whose account has been open for longer must pay the first payment within 14 days and can spread their payments over 8 months if needed.
- **High risk level**
 - Eligible for an installment plan with a first payment of at least 50%, made within 2 business days.
 - High risk customers whose account has been open for less than a year must complete the plan within 3 months.

Those whose accounts have been open for longer can complete the plan within 4 months.

Customers who have reached Dunning Level 40 are not eligible for Flex Pay options as the purpose of Flex Pay is to allow additional time for payment before the account becomes eligible for disconnection.

e. The Company provides information regarding bill assistance programs through outreach associated with applicable Dunning Levels. Mailed notices include information about bill assistance, and automated phone calls provide 2-1-1 referrals. The Company also uses Dunning Level data to conduct outreach to customers in arrears, including email communications that promote State Emergency Relief assistance at least monthly.

f. The Company provides customers with information regarding alternative rate plans. A customer may be eligible to have service billed on one of several rates or provisions of a rate. Upon request, the Company shall advise the customer in the selection of the rate or rate provision which is most likely to give the customer the lowest cos of service based on the information provided to the Company. The selection of the rate or provision is the responsibility of the customer. Because of varying customer usage patterns and other reasons beyond its reasonable knowledge or control, the Company does not guarantee that the most economic applicable rate will be applied.

g. The Company uses energy assistance data to solicit customer participation in energy waste reduction programs. Dunning Levels are not used to identify customers for this outreach, although customers receiving energy assistance may also be in the collection process.

Witness: Alex M Gast

Date: August 14, 2026

Question:

13. Please refer to page 7 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which references Sealed for Non-Payment (SNP)/Defaults. How are SNP / Default Amounts and Pending SNP/Default Dates set for each customer? Provide any specific formulas, calculation methods, or practices the Company uses to set SNP/Default Amounts and Pending SNP/Default Dates.

Response:

Common Dunning Procedures – begin when account is past due by at least \$200 and ends when account is paid down to less than \$75

<u>Dunning Procedure</u>	<u>Procedure Name</u>
01/A1	CMS Standard/Accelerated Dunning Procedure
02	CMS Installment Plans
04	CMS Budget Plan Dunning Procedure
06	CMS Final Bill Dunning Procedure
09	CMS Winter Protection Plan
17	CMS Multi Dwelling Dunning Procedure
S9	CMS Shut Off Protection (SPP) Dunning Procedure
C1	CMS CARE Dunning Procedure

Standard Dunning – for customers not on a payment plan or otherwise covered by a different procedure

The standard dunning process (DL 03) begins when an energy balance of \$200 or more becomes past due.

- Dunning process does not stop until past due balances go below \$75. As a result, a turn off notice could be sent on an account that is less than \$200 past due.
- Some Energy Assistance Programs and Budget Plan dunning processes vary from standard dunning. See individual program details.

Encourage Customers to:

- Sign up for billing and payment alerts

- Visit website for payments and additional resources

Standard Dunning for Active Accounts		
Dunning Level	Days in Arrears	Explanation
3	Due Date + 4	Level to Support Turn Off Notice Sync with Invoice
5	Due Date + 5	Turn-off Notice Mailed
10	Due Date + 9	Mid-Cycle Notice Call (mailed if no phone)
20	Due Date + 10	Turn-off Call
35	Due Date + 12	Intent to Disconnect Notice Mailed NOTE: If turn-off call was successful in Dunning Level 20, the Intent to Disconnect Notice is not mailed. We will proceed to DL 40
40	Due Date + 18	Create Dunning Disconnect Document

Standard Dunning – not for WPP OR SPP Dunning Notice Pending		
IF	AND	THEN
Customer's proposed payment will post within a maximum of 9 calendar days	Disconnect document has NOT been created	• If there has not been a stop action [dunning lock or FlexPay] on current notice - place dunning lock • If there has already been a stop action [dunning lock or IP] on current notice - advise caller further extension is not possible
	Disconnect document has been created	• Advise caller must be paid today to prevent possible SNP
	Disconnect order created	• Advise caller we are scheduled to disconnect
Customer's full payment will not post within 9 calendar days	Disconnect document	• Negotiate FlexPay according to policy

	has NOT been created	
--	-----------------------------	--

To be compliant, a customer is required to receive **two** dunning communications. They may only receive two.

After a customer hits Dunning Level 40, the Revenue Recovery Department may do a manual SNP Warning Call, advising the customer that they are eligible for disconnection. This communication is a courtesy to customers and is not required by the MPSC.

SPP & WPP Dunning

SPP & WPP Dunning Procedure		
Dunning Level	Bill Due Date + Calendar Days	Action
3	Due Date + 5	Plan amount not received
5	Due Date + 6	Plan default notice mailed
10	Due Date + 10	Second default notice (call or mail)
15	Due Date + 16	Deactivate plan; send default letter

If the default date has passed and SAP still shows the plan as enrolled, SPP/WPP customer has the remainder of the business day to make their payment.

- They will need to use a payment method that will post in real time, like Paymentus.
- If it is not a business day the payment needs to post by the next business day

Examples:

- SPP enrolled customer calls and their default date is today, Thursday (a business day), 8/25
 - The customer must post their payment today, 8/25 to avoid default tomorrow, Friday 8/26.
- SPP enrolled customer calls and their default date is Saturday (a non-business day), 8/27
 - The customer must post the payment to the account by the next business day, Monday 8/29.

Note: If customer is on SPP/WPP and will potentially default, system must be allowed to complete default process before another payment arrangement can be entered, including FlexPay.

SPP or WPP Default Notice Pending		
IF:	AND:	THEN:
Customer is going to pay the notice amount	And it WILL post on or before the expiration date	No action needed
	And it WILL NOT post on or before the expiration date	Advise caller they will be in default and provide them with proposed shutoff date or date they can call back or enroll through IVR or web for FlexPay or other arrangements
Customer has already paid notice amount	And it WILL post on or before the expiration date	No action needed
	And it WILL NOT post on or before the expiration date	Place dunning lock

CARE Dunning Procedure

CARE Dunning Procedure (C1)		
Dunning Level	Days in Arrears	Explanation
3	Due Date + 4	Mail Warning Letter
5	Due Date + 34	Mail Default Notice with Due Date (11-day due date)
10	Due Date + 38	Phone Call
20	Due Date + 44	Deactivate from CARE program
	Due Date + 44	CARE Reset Dunning to Level 03 (A1)

Important: Account will go into DL3 when it is past due by 1 payment. Account will go into DL5 when it is past due by 2 payments. If BP is removed from CARE, they will follow the Standard Dunning Procedure.

Witness: Alex M Gast

Date: August 14, 2026

Question:

14. By month, since January 2019 through the most recent month data is available, how many customers defaulted from the following programs? If data is not available for the full date range or by month, provide data by quarter or by year, and as far back as data is available.

- a. Winter Shutoff Protection (WPP);
- b. Shutoff Protection Plan (SPP);
- c. Consumers Affordable Resource for Energy (CARE) Program;
- d. Percentage of Income Payment Plan (PIPP);
- e. and Other Installment Plan (IP).

Response:

See 436_Gast_Att_1

Witness: Alex M Gast

Date: August 17, 2026

Question:

15. How does a customer enroll in the Shutoff Protection Plan (SPP)? Please provide copies of all required forms, a list of steps the customer must complete, and the associated enrollment timelines.

Response:

Customer Service Representatives can assist customers in enrolling in the Shut Off Protection Plan. There are no required forms for customers to complete. CSRs are required to verbally confirm that the service address is the primary address of the account holder. They are also required to verbally confirm if the customer receives any state assistance and/or their current gross household income. There is a form built into the system that uses the details entered by the CSR to verify if the customer is eligible. Once confirmed, the customer can be enrolled. The customer is not eligible if the account has two failed attempts, two defaults, or any combination of two in the past 12 months across both Shut Off Protection Plan and Winter Protection Plan. Customers can request enrollment year-round as long as their account has been active for a minimum of 60 days and are required to pay a down payment within 14 days of requesting the plan. The down payment must post to complete their enrollment. Customers who enroll in SPP waive their rights to enroll on Winter Protection Plan for 12 months. First attempts are a 10% down payment and second attempts are a 20% down payment. In the event of a technology or documented company error, Contact Center Supervisors can complete enrollments outside of these criteria.

Witness: Alex M Gast

Date: August 14, 2026

Question:

16. How does a customer enroll in the Winter Protection Plan (WPP)? Please provide copies of all required forms, a list of steps the customer must complete, and the associated enrollment timelines.

Response:

Customer Service Representatives can assist customers in enrolling in the Winter Protection Plan. There are no required forms for customers to complete. CSRs are required to verbally confirm that the service address is the primary address of the account holder. They are also required to verbally confirm if the customer receives any state assistance and/or their current gross household income. There is a form built into the system that uses the details entered by the CSR to verify if the customer is eligible. Once confirmed, the customer can be enrolled. The customer is not eligible if the account has two failed attempts, two defaults, or any combination of two in the past 12 months across both Shut off Protection Plan and Winter Protection Plan. Customers can request enrollment from November 1 and March 31 and are required to pay a down payment within 14 days of requesting the plan. The down payment must post to complete their enrollment. Customers who have enrolled in SPP waive their rights to enroll on Winter Protection Plan for 12 months. Down Payments are equal to 1/12 of the total past due balance at the time of enrollment. In the event of a technology or documented company error, Contact Center Supervisors can complete enrollments outside of these criteria.

Witness: Alex M Gast

Date: August 14, 2026

Question:

17. Describe all known causes of erroneous or incorrect disconnections, how the Company learns of these errors, and any steps the Company takes to mitigate these issues.

Response:

The Company defines an erroneous or incorrect disconnection for non-payment as a disconnection that occurs in a manner that is not consistent with applicable rules, tariffs, or required customer protections.

Previously identified resolved causes may include, but are not limited to, system configuration or processing errors, customer account coding or status errors, that may affect whether an account is eligible for disconnection.

The Company may learn of an erroneous or incorrect disconnection through customer escalations or complaints, regulatory inquiries, internal audits, monitoring activities, quality assurance reviews, or other internal controls. When the Company identifies an erroneous or incorrect disconnection, it evaluates the issue, identifies impacted customers, restores service where the customer remains disconnected, suspends related disconnection activity if the issue is ongoing, determines the root cause, and implements appropriate corrective actions. Corrective actions may include customer remediation, such as refunds or credits when warranted, process updates, system corrections or enhancements, additional controls, and internal or regulatory reporting when required or appropriate.

Witness: Alex M Gast

Date: August 14, 2026

Question:

18. If the Company erroneously or incorrectly disconnects a customer, how does the Company resolve that occurrence?

Response:

When the Company identifies an erroneous or incorrect disconnection, it engages appropriate internal stakeholders to review and investigate the occurrence. The investigation includes identifying the impacted customer or customers, determining whether service remains disconnected, assessing the circumstances that led to the disconnection, and determining the appropriate corrective action.

If the issue is ongoing and presents a risk of additional erroneous disconnections for non-payment, the Company suspends the affected disconnection activity until appropriate mitigation is implemented. Where a customer remains disconnected due to an erroneous or incorrect disconnection, the Company works to restore service as appropriate and evaluates whether customer remediation is warranted, including credits, refunds, or other corrective measures.

After the root cause is identified, the Company implements appropriate corrective actions, which may include system corrections or enhancements, process updates, additional controls, quality assurance reviews, or other mitigation measures designed to reduce the risk of recurrence. If disconnection activity has been suspended, it does not resume until appropriate mitigation is in place.

Witness: Alex M Gast

Date: August 14, 2026

Question:

19. By month, since January 2019 through the most recent month for which data is available, how many disconnections were later determined to have been erroneous or incorrect?

Response:

Data is only available from 2025 and 2026 and is not available by month.

2019	No data available
2020	No data available
2021	No data available
2022	No data available
2023	No data available
2024	No data available
2025	64
2026	13

Witness: Alex M Gast

Date: August 14, 2026

Question:

20. Please refer to page 3 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1. What does the "SNAP" acronym stand for and refer to? Please provide all current SNAP guidelines, articles, field work warnings, and other training or guidance documents that the Company provides to its staff.

Response:

Objection of Counsel: Consumers Energy Company objects in part to this discovery request because the request for every current SNAP guideline, article, field work, warnings, and other training or guidance documents available to CSRs is unduly burdensome and is not proportionate to the needs of this case as it is overly broad and it would be unduly burdensome and time consuming to attempt to compile the information requested further than what has already been provided. Additionally, the request as worded seeks information that may be outside the scope of this proceeding and is not reasonably calculated to lead to the discovery of admissible evidence. Subject to this objection, and without waiving it, Consumers Energy answers as follows:

SNAP stands for ServiceNow Advocate Portal and is the working knowledge base for all Customer Service Representatives ("CSR"). The training that CSRs receive is sourced from it and they refer to it throughout training.

The materials provided in response to U22070-UCC-CE-0105, Gast Attachment 1, provide a clear overview of the topics on which CSRs are trained.

Additionally, the Company's knowledge resources and processes continue to evolve. There is currently a restructuring of several articles, and upcoming S/4HANA changes will impact many processes. While the underlying information remains the same, article names, layouts, and process documentation may change, making detailed references outdated. For that reason, the lesson plan provided strikes the right balance by showing what CSRs learn without tying the content to specific articles or process steps.

Date: August 17, 2026

Question:

21. In U22070-UCC-CE-0105_Gast_Att_1, the SAP screenshots have a space for Dunning Procedure (e.g., PDF file page 118 (“CARE-Enrolled” slide 12, “CMS Accelerated Dunning Procedure”)). Please provide all Dunning Procedure codes the Company uses, the definition of each, the associated procedures, and the customer conditions, criteria, or circumstances for when each code is applied.

Response:

Dunning Procedure	Procedure Name
01	CMS Standard Dunning Procedure. This would be an account not enrolled on any programs.
02	CMS Installment Plans. This would be an account enrolled on an Installment Plan (flex plan).
04	CMS Budget Plan Dunning Procedure. This would be an account enrolled on the Budget Plan.
06	CMS Final Bill Dunning Procedure. This would be an account that has been final billed.
07	CMS Bankruptcy Dunning Procedure. This would an account that has been filed in Bankruptcy.
09	CMS Winter Protection Plan. This would be an account that is enrolled on the Winter Protection Plan.
10	CMS SD General. This is an account with general non-energy charges.
13	CMS Collective Invoicing. This would be an account where multiple individual customer invoices are under a single collective account.
14	CMS Greenpower Dunning Procedure. This would be an account enrolled in Greenpower.
15	CMS SD Review. This would be an account for non-energy services, for example a Damage Claim.
17	CMS Multi Dwelling Dunning Procedure. This would be an account that is centrally metered but provides service to multiple locations.

18	CMS WO ST DR – Release to Collection Agency. This would be a Bankruptcy account that is an unpaid final bill not with an outside collection agency.
19	CMS WO ST DR – Bankruptcy with No Release. This would be a final billed Bankruptcy account that is no with an outside collection agency.
20	CMS CAP Loans. This would be an account that was provided a loan for the Customer Attachment Program.
21	CMS Real Estate. These would be an account for leases, licenses, easements, temporary workspace, title research or field agent negotiations.
A1	CMS Accelerated Dunning Procedure. This is an account that has defaulted from a payment plan.
C1	CMS CARE/PIPP Dunning Procedure. This would be an account that is enrolled on CARE.
S9	CMS Shut Off Protection (SPP) Dunning Procedure. This would be an account that is enrolled on the Shut Off Protection Plan.
SG	Solar Garden Dunning Procedure. This would be an account that is enrolled in Solar Gardens.

Date: August 14, 2026

Question:

22. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans.

- a. Please spell out the "ASP" and "CO" acronyms and provide their definitions.
- b. Provide all possible codes or statuses for ASP and CO plans.

Response:

a. The SAP screenshots referenced refer to Appliance Service Plans and Carbon Monoxide plans, neither of which is currently provided by the Company. The space this refers to is an obsolete legacy visual artifact only.

b. Not applicable

Witness: Alex M Gast

Date: August 14, 2026

Question:

24. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans. How does the Company determine the customer charges associated with each type of ASP and CO plan? Please provide any associated formulas or calculation methodologies.

Response:

The SAP screenshots referenced refer to Appliance Service Plans and Carbon Monoxide plans, neither of which is currently provided by the Company. The space this refers to is an obsolete legacy visual artifact only.

Witness: Alex M Gast

Date: August 14, 2026

Question:

25. Please refer to the SAP screenshots provided in Consumers' response to U22070-UCC-CE-0105, Gast Attachment 1, which indicate ASP and CO plans. Can customers be disconnected for current or past-due charges on ASP or CO plans? If yes, please describe all related policies and procedures.

Response:

The Company does not disconnect customers for past due Appliance Service Plan charges, and Carbon Monoxide plans and all associated services were discontinued in 2020.

Witness: Alex M Gast

Date: August 14, 2026

Question:

26. For dual gas and electric customers who have received an Intent to Disconnect notice:

- a. How does the Company account for past-due balances on dual accounts?
- b. What options do dual customers have to direct payment to one account rather than to another?
- c. How does the Company communicate any options that customers have to direct payments to one account rather than another to dual customers who face potential disconnection(s)?
- d. How do customers exercise any options that they have to direct payment to one account rather than another?
- e. How does the Company communicate these options to dual customers who face potential disconnection(s)?
- f. How does the Company allocate payments between the past due balances on dual accounts in the absence of any specific direction from a customer?
- g. If a customer cannot avoid disconnection on both accounts, what options do they have to prevent disconnection on one of the accounts?
- h. How does the Company communicate these options to prevent disconnection on one of the accounts to dual customers who face potential disconnection(s)?

Response:

- a. The majority of customers with both gas and electric services with Consumers Energy have both services billed under a single account encompassing both commodities.
- b. For customers who are subject to disconnection and receive both electric and natural gas service, the Company follows applicable Michigan Administrative Code requirements, including Mich Admin Code R 460.123(7)(b), which allows a customer, under applicable circumstances, to choose to retain either electric service or natural gas service if faced with shutoff, provided the customer allows the utility access to shut off the service not selected for retention.
- c. The Company communicates this option through the shutoff notice provided to the customer.
- d. Customers need to contact the Company to confirm eligibility and request to retain either electric service or natural gas service, as applicable.
- e. As noted in response to subpart c, the Company communicates this option through the shutoff notice provided to the customer.
- f. Under the Company's current system configuration, open items for both gas and electric services are sorted and cleared based on the due date. There is no logic in place that prioritizes one commodity over the other during the clearing process in the variant.

g. If a customer cannot avoid disconnection of both services, the customer may request to retain one service, subject to applicable rules and eligibility requirements. In addition, standard credit and customer assistance options may be available, including payment arrangements, energy assistance, and applicable holds or protections, depending on the customer's circumstances and eligibility

h. The Company communicates the option to retain one service through the shutoff notice provided to the customer. Customers may also contact the Company to discuss available payment arrangements, assistance options, holds, or other applicable protections.

Witness: Alex M Gast

Date: August 14, 2026

Question:

27. Describe any efforts by the Company to address long-duration disconnections or households that experience multiple disconnections.

Response:

For customers who remain disconnected for non-payment for more than four days, the Company conducts proactive outreach through an automated outbound telephone call. During the call, customers are informed that service remains disconnected, advised that payment arrangement options may be available where eligible, reminded that unauthorized self-reconnection is unlawful and may be dangerous, and encouraged to apply for energy assistance programs that may help restore service and support continued service.

If direct telephone contact is unsuccessful, the Company mails a follow-up letter containing substantially similar information. These outreach efforts are intended to help customers understand available options to reconnect service and identify assistance resources that may reduce the risk of extended or future disconnections.

Question:

28. By month, since January 2019 through the most recent month data is available, what are the default rates of Flex Plans (aka "Installment Plans") for customers with the following risk level assignments?

- a. Low risk level;
- b. Medium risk level; and
- c. High risk level.

Response:

The Company uses "low, medium, and high" risk level indicators within a CSR workflow to help determine which plan options may be offered to a customer. These risk level indicators are not separately documented as customer-level classifications, and the Company does not maintain a record identifying the risk category assigned to a customer at the time of the interaction.

Accordingly, while the risk indicator may inform the options presented by the CSR, the Company does not document outcomes in terms of "low, medium, or high" risk level categories. As a result, the Company cannot attribute a subsequent Flex Plan enrollment or default to a specific risk level assignment.

Date: August 17, 2026

Question:

29. Please refer to page 1 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 4, which states that as of January 1, 2026, Critical Peak Pricing (CPP) and Peak Time Rewards (PTR) should not be promoted. Why does the Company no longer promote these programs?

Response:

The Company paused active promotion of Critical Peak Pricing ("CPP") and Peak Time Rewards ("PTR") effective January 1, 2026, as part of its ongoing efforts to improve the cost-effectiveness of its residential demand response portfolio. The programs remain available to customers, and customers may continue to enroll through self-enrollment channels or upon request through a Customer Service Representative.

Internal evaluations and planning analyses indicated that PTR delivers lower demand savings on a per-customer basis than certain other residential demand response offerings (such as the Smart Thermostat Program) and that updated planning assumptions reflected lower demand capability values than previously forecasted. As a result, the Company reduced program-related expenditures, including enrollment incentives, and repositioned PTR as an entry-level demand response offering while prioritizing programs that provide more predictable and controllable demand reductions.

Witness: Alex M Gast

Date: August 14, 2026

Question:

30. Please refer to page 1 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 4, which states that as of January 1, 2026, Critical Peak Pricing (CPP) and Peak Time Rewards (PTR) incentive payments are paused. Why are the incentive payments paused?

Response:

As discussed in Response U22070-UCC-CE-0451, the Company has paused active promotion of Critical Peak Pricing ("CPP") and Peak Time Rewards ("PTR") effective January 1, 2026, as part of its ongoing efforts to improve the cost-effectiveness of its residential demand response portfolio. The programs remain available to customers, and customers may continue to enroll through self-enrollment channels or upon request through a Customer Service Representative.

The incentive payments referred to in this document were related to the CSR incentives provided for any customer enrollments they were able to complete and were not a reference to customer incentives.

Witness: Alex M Gast

Date: August 14, 2026

Question:

31. Please refer to page 1 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 4, which states that as of January 1, 2026, Critical Peak Pricing (CPP) and Peak Time Rewards (PTR) incentive payments are paused. If the Company enrolls a customer in the Critical Peak Pricing (CPP) and Peak Time Rewards (PTR), does the Company communicate to the enrolling customer that "the incentive program is paused and that payouts will not be made"?

Response:

The incentive payments referred to in this document were related to the CSR incentives provided for any customer enrollments they were able to complete and were not a reference to customer incentives.

Witness: Alex M Gast

Date: August 14, 2026

Question:

32. What are the average savings per kWh for participants in the following rate programs?

- a. Critical Peak Pricing (CPP);
- b. Peak Time Rewards (PTR); and
- c. AC Cycling.

Response:

a. Critical Peak Pricing (CPP): CPP customers receive discounted off-peak pricing during the summer period (June 1 through August 31). Based on current tariff rates, the off-peak rate is approximately 17.0¢/kWh, compared to the standard summer off-peak rate of 17.8¢/kWh, resulting in an average savings of approximately 0.8¢/kWh on eligible off-peak usage.

b. Peak Time Rewards (PTR): PTR participants receive a \$1.00 bill credit for each kWh reduced during a Peak Time Rewards event relative to their baseline usage. PTR does not provide a reduced energy rate; savings are earned through event-based incentives rather than a lower \$/kWh charge.

c. AC Cycling participants receive a fixed \$5 monthly bill credit during the summer season (June through August) and do not receive a reduced energy rate. With the monthly credit applied, AC Cycling customers receive about a 3% discount during the summer months bringing the kWh savings to 0.534¢/kWh.

Witness: Alex M Gast

Date: August 14, 2026

Question:

33. By month, since January 2019 through the most recent month data is available, what percentage of participants in each of Critical Peak Pricing (CPP), Peak Time Rewards (PTR), and AC Cycling rates were designated by the Company as low-income (i.e., participating in an income-eligible bill assistance program or known to participate in SER, LIHEAP, etc.)?

Response:

See 455_Gast_Att_1

Witness: Alex M Gast

Date: August 17, 2026

Question:

34. Why are the enrollments for Critical Peak Pricing (CPP), Peak Time Rewards (PTR), and AC Cycling capped, how were each of the program caps established, and by whom were each of the program caps established?

Response:

Enrollments in CPP and PTR are not capped. Presently, any eligible customer can still enroll in CPP and PTR.

The Company determined through a cost-effectiveness review that the AC Cycling program would enter maintenance mode beginning in 2025, resulting in the termination of new installation pathways and effectively limiting future enrollment primarily to customers moving into premises with existing equipment.

Witness: Alex M Gast

Date: August 14, 2026

Question:

35. What are the average consumption changes (overall kWh, on-peak, critical peak kWh) and financial benefits per participant for each of Critical Peak Pricing (CPP), Peak Time Rewards (PTR), and AC Cycling?

Response:

Program	Average kWh Reduction Per Event	Average \$ Savings Per Event
Peak Time Rewards	0.48	\$1.37
Critical Peak Pricing	0.68	(\$7.30)
AC Peak Cycling	0.96	\$0.25

Of note, Critical Peak Pricing (CPP): CPP customers receive discounted off-peak pricing during the summer period (June 1 through August 31). Based on current tariff rates, the off-peak rate is approximately 17.0¢/kWh, compared to the standard summer off-peak rate of 17.8¢/kWh, resulting in an average savings of approximately 0.8¢/kWh on eligible off-peak usage.

Witness: Alex M Gast

Date: August 14, 2026p

Question:

36. Please refer to page 3 of Consumers' response to U22070-UCC-CE-0105, Gast Attachment 6, which indicates that the AC Cycling program is not accepting new participants. Why not?

Response:

The Company determined through a cost-effectiveness review that it would be prudent for the AC Cycling program to enter maintenance mode beginning in 2025, resulting in the termination of new installation pathways and effectively limiting future enrollment primarily to customers moving into premises with existing equipment.

Witness: Alex M Gast

Date: August 14, 2026

Question:

37. Please refer to Consumers' response to U22070-UCC-CE-0135 and U22070-UCC-CE-0136. Please provide all program-specific metrics, operational metrics, participation metrics, long-term success metrics, and any other metrics relevant to these responses. For each metric, provide the metric title, definition, list of programs the metric is used by, calculation method, and the quantitative value, by month, since January 2019 through the most recent month for which data is available.

Response:

Metric Notes

- The metrics requested are evaluated at the end of the program (fiscal year) as such they are not available by the monthly grain.
- Payment information is limited to only approximately 4 years rolling data. The information provided for dates preceding is not available aside from historical static reporting.
- Customer counts are not deduplicated across programs. A contract account may receive assistance through multiple programs during the same fiscal year.
- Financial values are presented in millions of dollars and rounded to the nearest \$0.01 million.

Metric Definitions

Customers

- The count of distinct contract accounts receiving assistance through the identified program during the applicable fiscal year.

Total Assistance

- The sum of all assistance dollars associated with payment transactions mapped to the applicable program payment code during the applicable fiscal year.

Program Definitions

- **SER** = State Emergency Relief
- **HHC** = Home Heating Credit
- **CARE** = Consumers Affordable Resource for Energy
- **ANA** = As Needed Assistance (historically referred to as One-Time Assistance (OTA))

Program	FY21 Customers	FY21 Total Assistance	FY22 Customers	FY22 Total Assistance	FY23 Customers	FY23 Total Assistance
SER	42,198	\$20.34M	52,527	\$33.15M	65,808	\$37.80M
HHC	46,703	\$11.48M	56,853	\$15.89M	64,614	\$18.90M
CARE	11,351	\$10.87M	10,393	\$10.28M	11,804	\$10.40M
ANA	18,000	\$9.18M	N/A	\$8.37M	N/A	\$9.20M

Program	FY24 Customers	FY24 Total Assistance	FY25 Customers	FY25 Total Assistance
SER	54,047	\$38.44M	59,391	\$25.97M
HHC	61,221	\$12.77M	56,747	\$11.01M
CARE	11,216	\$8.80M	9,650	\$8.98M
ANA	9,904	\$7.20M	6,229	\$5.49M

Witness: Alex M Gast

Date: August 14, 2026

Question:

38. For customers who remain disconnected due to non-payment, provide all Company policies or procedures for communicating with and/or reconnecting these customers in advance of extreme weather, such as extreme heat or extreme cold.

Response:

Under the Company's internal procedures, when extreme weather is forecasted for two or more consecutive days, the Company initiates an automated outbound telephone call to residential customers who remain disconnected for non-payment and were disconnected within the previous 30 days.

The call informs customers of the extreme weather conditions forecast, encourages them to contact the Company regarding available reconnection options, and provides a 2-1-1 referral for community assistance resources. Customers may be reconnected consistent with applicable rules, tariffs, Company procedures, and any available payment arrangements, assistance, holds, or protections for which the customer is eligible.

Witness: Alex M Gast

Date: August 14, 2026

Question:

40. Please reference page 11 of Witness Foster's testimony, "Digitization of Company Records Costs" and Consumers' response to U22070-UCC-CE-0140. Approximately what percentage of these records are more than seven years old?

Response:

Approximately 70% of the records identified for digitization are more than seven years old.

Witness: MATTHEW J FOSTER

Date: August 17, 2026

Question:

42. Please reference Consumers' response to U22070-UCC-CE-0141. Please provide any analysis or data that the Company has regarding the frequency and volume of documents retrieved from the Company's record center.

Response:

The Company does not track the volume of documents retrieved. A single employee visits the Corporate Information Governance center each week to retrieve requested records as needed to support ongoing business operations. A typical week includes the retrieval of 10 to 30 requests.

Witness: MATTHEW J FOSTER

Date: August 17, 2026

Question:

44. Does the \$10 million cost to digitize records referenced in Consumers' response to U22070-UCC-CE-0141 directly reflect vendors' pricing estimates? If the Company has adjusted its estimate based on the estimates it received from the vendors, please detail the reasons for the difference in the cost estimate and the methodology the Company used to arrive at its own estimate.

Response:

The \$10 million cost for the digitization of records directly reflects the vendor pricing estimates.

Witness: MATTHEW J FOSTER

Date: August 17, 2026

Question:

45. By census tract, what is the percentage of residential customers with smart meters? If census tract resolution data is not available, provide data at the finest geographic resolution available (e.g., zip code).

Response:

This information is not readily available by census tract. In Attachment 1 to this discovery response, please see the requested information by zip code.

Witness: Emily M Duke

Date: August 14, 2026

Question:

46. What model or models of smart meters do Consumers' residential customers have? Please provide the manufacturer, model number, and model year for each type of smart meter deployed.

Response:

All smart meters installed with the Company's residential customers are manufactured by Itron. They are all of the model called OpenWay Centron Single-Phase Cellular ITRJ. The Company has purchased meters every year from 2015 through 2026, so all of those model years are present in the Company's system. The majority of purchases were between 2015 and 2018.

Witness: Emily M Duke

Date: August 14, 2026

Question:

47. For each type of smart meter deployed in response to question 46, please indicate whether each of the smart meter models has the capacity to limit the flow of electricity to residential customers to a set wattage, and if yes, what that wattage is.

Response:

None of the meters referenced in discovery response 22070-UCC-CE-0468 have the capacity to limit the flow of electricity to residential customers to a set wattage.

Witness: Emily M Duke

Date: August 14, 2026

Question:

48. Please indicate whether Consumers' existing IT platforms have the ability or could be configured to limit the flow of electricity to residential customers to a set wattage.

Response:

The Company's existing IT platforms do not have this capability.

Witness: Emily M Duke

Date: August 14, 2026

Question:

49. For each type of smart meter model, please provide the count and percentage of residential customers who have that model. Please also provide the count and percentage of residential customers who do not have a smart meter.

Response:

As stated in discovery response 22070-UCC-CE-0468, all smart meters on the Company's system are the same type. As shown in discovery response 22070-UCC-CE-0467_Duke_ATT_1, 1,655,117 residential customers have smart meters, whereas 8,555 (0.51% of the total) do not.

Witness: Emily M Duke

Date: August 14, 2026

Question:

50. For customers without smart meters, please provide the percentage of smart meters that were not installed because of:

- a. Incompatible electrical or wiring systems;
- b. Poor wireless signal coverage;
- c. Customer refusal to have a smart meter installed; or
- d. All other causes.

Response:

As identified in discovery response 22070-UCC-CE-0471, the Company currently has 8,555 residential customers who do not have smart meters installed. All of these customers (i.e., 100%) have opted out of having a smart meter installed and would therefore be part of subpart c. No residential customers lack a smart meter due to incompatible electrical or wiring systems; poor wireless signal coverage; or any other identified cause.

Witness: Emily M Duke

Date: August 14, 2026
